

At Home

I use Venmo to pay for my friends, my roommates and to run my business, but I also use other payment app such as Splitwise to track my expenses.

Can I use Venmo to track all the expenses?

before going to bed...

I venmo my roommates because we take turns when paying for food and groceries.

I also use Splitwise to track/manage my expenses.

when working from home..

I share my transactions in Venmo's public feed as they serve as free marketing for my business.

How else can I get free promotion for my business?

Commuting

I don't have to bring cash with me when going out because I'm confident I can manage entire day with Venmo.

moving in the world

waiting for the shuttle...

I like to see what my friends are up to from their news feed.

during commute...

I use remind feature to remind my friends of their debts

getting back home after dinner...

I request my friends for their shares of the dinner bill.

I want to know if all my friends pay back their shares.

At School/ Work

I use Venmo to pay/request money from my friends and coworkers.

The sooner I finish the task, the better.

during the break...

My friend notifies me the pending payments for party expenses through FB.

waiting in the line....

I like to use my free time such as waiting in the line for lunch to settle my debts.

after having lunch...

When I go out for lunch with my co-workers, we use it to split our bills right away.
